

Education

University of California, Irvine

Ph.D. in Computer Science | Advisor: Dr. Pierre Baldi | GPA: **4.0**

Irvine, CA
2024 - Currently

California State University, Los Angeles

Master of Science in Computer Science | GPA: **4.0**

Thesis: Deep Reconstruction Model for Exposing Low Concentration Metabolites in Edited-MRS Brain Scans.

Los Angeles, CA
2022 - 2024

Indraprastha Institute of Information Technology, Delhi

Bachelor Of Technology in Computer Science | Upper GPA: **3.2**

Thesis: Multiple Myeloma(MM) Cancer Cell Instance Segmentation

New Delhi, IN
2017 - 2021

Research Interests

- Deep Learning Applications in Healthcare and Biomedicine
- Generative Models for Computational Drug Discovery
- Machine Learning in Bio/Health Informatics

Publications

➤ Theses

Deep Reconstruction Model for Exposing Low Concentration Metabolites in Edited-MRS Brain Scans. [Published on ProQuest]

Multiple Myeloma Cancer Cell Instance Segmentation. A tool to detect and segment MM cancer cells from bone marrow aspirate slides using Deep Learning. [Published as B.Tech Thesis in IIIT Delhi Thesis Archive 2021. | <https://arxiv.org/abs/2110.04275>]

Scholarships, Student Grants, Honors, and Awards

- University of California, Irvine - **Computer Science Department Research Fellowship 2024.**
- California State University, Los Angeles - **Outstanding Graduate Student Award 2024.**
- California State University, Los Angeles Annual Student Symposium on Research, Scholarship, and Creative Activities (RSCA 2024) - **Outstanding Oral Presentation Award.**
- 14th ACM Conference on Bioinformatics, Computational Biology, and Health Informatics (ACM-BCB 2023) - **Best Paper Finalist Award.**
- California State University, Los Angeles Non-Resident Tuition Fee Waiver Scholarship 2023.
- CSUBIOTECH Faculty-Student Research Collaboration Grant 2023.
- California State University, Los Angeles Graduate Scholarship 2023.
- CSUBIOTECH Student Research Travel Grant 2023.
- California State University, Los Angeles - Computer Science Department - **Dean's List 2022 & 2023.**

Skills

Programming Languages: Python, Java, Javascript, HTML/CSS, C/C++, SQL.

Tools and Libraries: Tensorflow, PyTorch, Keras, Scikit-Learn, OpenCV, NumPy, Pandas, Django, Docker, Tableau, High-Performance Computing, Bash/Sh/Zsh, Raspberry Pi/Arduino.

Cloud Technologies: Vertex AI, Compute Engine, BigQuery, Kubernetes Engine

Research Experience

Baldi Lab, University of California, Irvine

Graduate Research Assistant

Researching in Machine Learning, Deep Learning, and Artificial Intelligence, particularly their applications in Healthcare and Biomedicine under Dr. Pierre Baldi

Irvine, CA

07/2024-Currently

Computational Molecular Biology Lab, California State University, Los Angeles

Graduate Research Assistant

Conducted research in Deep Learning based drug discovery under Dr. Negin Forouzes and published a paper at the ACM-BCB 2023 conference on finding new drug candidates using conditional deep generative models.

Los Angeles, CA

03/2023-07/2024

Machine Learning and Sensing Lab, California State University, Los Angeles

Graduate Research Assistant

Conducted research for Artificial Intelligence in Healthcare under Dr. Navid Amini and published a paper on deep learning-based GABA signal reconstruction from raw MRS scans at the ISVC 2023 conference.

Los Angeles, CA

01/2023-05/2024

SBI Lab, IIIT Delhi*Research Associate*

Worked on building Deep Learning Solutions for Bio-Medical Applications under Dr. Anubha Gupta and published a paper on Multiple myeloma cancer risk stratification in Elsevier's CIBM journal.

New Delhi, IN

11/2021-08/2022

SBI Lab, IIIT Delhi*Undergraduate Researcher*

Built a low-cost MM Cancer Cell Detection and Segmentation System using Deep Learning Methodologies under advisor Dr. Anubha Gupta, IIITD, in collaboration with Nvidia and Dr. Ritu Gupta(Prof., Dept. of Oncology AIIMS).

New Delhi, IN

02/2020-07/2021

MIDAS Lab, IIIT Delhi*Undergraduate Researcher*

Created a User Preference Mapping System Using Deep Learning Architectures and published a paper on the same at the IEEE BigMM'2020 conference under advisor Dr. Rajiv Ratn Shah, IIITD, and in collaboration with Dr. Yi Yu from NII, Japan.

New Delhi, IN

01/2020-09/2020

Teaching Experience

University of California, Irvine

Teaching Assistant for COMPSCI 171 - Introduction to Artificial Intelligence in Winter 2025

Computational Molecular Biology Lab, California State University, Los Angeles

Taught Intro to Deep Learning Course for Lab Undergraduates in Summer 2023 and 2024

California State University, Los Angeles

Teaching Assistant for CS4550 - Computer Graphics in Fall 2023

California State University, Los Angeles

Teaching Assistant for CS4540 - Data Visualization in Spring 2022

Selected Projects

Deep Learning Based GABA Edited-MRS Signal Reconstruction

A dual encoder head self-attention-based deep learning model to reconstruct the Edited MRS signal for acquiring GABA concentration and benchmark the model's performance on simulated raw MRS data from real GABA-edited ground truths. Our model achieves a 95% decrease in Mean Squared Error (MSE), a 70% decrease in Linewidth, a 450% increase in Signal to Noise Ratio (SNR), and a 42% increase in Peak Shape Score compared to the current existing method on the test set.

Physics-Guided Deep Generative Model for New Ligand Discovery

A novel hybrid conditional variational autoencoder that utilizes both the structural grids and the physics-based features to generate new drug candidate structures conditioned on a receptor protein that have significantly higher binding free energy when compared to reference ligands.

MuSARCyto: Multi-Head Self-Attention-based Representation Learning for Unsupervised Clustering of Cytometry Data

A novel multi-head self-attention-based representation learning network that performs clustering to isolate different cell types in mass cytometric data. Our model outperforms previous SOTA by more than 13% in F1 score on 2 different benchmark datasets.

CoSP: An Interpretable AI Model on COVID-19 Severity Prediction using Clinical Data at Hospital Admission

A Hierarchical Strategy Random Forest-based COVID-19 severity predictor with feature vs. output interpretability providing an AUC-ROC of 0.95, 18% better than the previous best work.

GCRS: A Hybrid Graph Convolutional Network for Risk Stratification in Multiple Myeloma Cancer Patients

A GCN-based Risk Stratification system for cancer risk-stage prediction of newly diagnosed MM patients achieving a concordance index of 0.68 on the MMRF dataset as compared to state-of-the-art, managing only 0.67.

Multiple Myeloma Cancer Cell Instance Segmentation

A modified MaskRCNN-based arch for segmenting MM cancer cell instances from microscopic cell slide images with BoxAP of 64.7, MaskAP of 65.6, and an mIOU of 0.86, all metrics performing better than the SOTA.

PAI-BPR: Personalized Outfit Recommendation Scheme with Attribute-wise Interpretability

A Deep Learning-based attribute-wise user preference matching and learning using Bayesian Personalized Ranking obtained an AUC of 0.8502, increasing it by 2% more than the best previous work.

Photorealistic Facial Expression Synthesis using Conditional Generative Adversarial Networks

A GAN-based tool that generates photorealistic images containing different facial expressions from an input image based on a conditional emotion input.

Cloud Structure Instance Segmentation

A Kaggle Challenge on NASA's Sattelite data by Max Plank Institute of Meteorology to classify different types of cloud structures. Achieved using a MaskRCNN implementation to classify and create masks on Satellite images, attaining a Dice coefficient of 0.5876, 5% better than other segmentation models.

Certifications

- **Tensorflow on Google Cloud** from Google Cloud.
- **Google Cloud Big Data and Machine Learning Fundamentals** from Google Cloud.
- **Feature Engineering** from Google Cloud.
- **Machine Learning in the Enterprise** from Google Cloud.
- **Production Machine Learning Systems** from Google Cloud.
- **TensorFlow Developer Professional Certificate** from DeepLearning.AI
- **Machine Learning and Reinforcement Learning in Finance Specialization Certificate** from NYU
